ANALYSIS MATHEMATICA

TOMUS 20 **1994**

CONTENTS—СОДЕРЖАНИЕ

Arkhipov, G. I., Sadovnichiĭ, V. A. and *Chubarikov, V. N.*, A generalization of the Heine limit for functions which converge on a base 161–171

Baron, S. und *Tietz, H.*, Produktsätze für Verfahren zur Limitierung von Doppelfolgen 81–94

Chandra, P. and *Dikshit, G. D.*, The absolute generalized harmonic-Cesàro summability of a Fourier series 173–183

Człapiński, T., On some nonlinear Volterra integral-functional equation in several variables 241–253

Han, W., Notes on best constants in some Sobolev inequalities 3–10

Карапетян, А. О., Интегральные представления в трубчатых областях над полиэдрами и вопросы приближения функций 185–203

Leindler L., Some inequalities of Hardy–Littlewood type 95–106

————, On power series with positive coefficients 205–211

————, On two theorems of Hardy and Littlewood concerning moment constants 255–262

Ôhashi, K., Central limit theorems for Walsh series with general gaps 11–25

Pál L. G., A constructive method for uniform approximation by means of integrated Lagrange interpolation polynomials in the space $C^1[a,b]$ 27–34

Potapov, M. K. and *Tankaeva, S. K.*, On approximation of functions on the half-line by algebraic polynomials 107–115

Пустовойтов, Н. Н., Представление и приближение периодических функций многих переменных с заданным смешанным модулем непрерывности 35–48

Ramazanov, A.-R. K., On approximation of functions in terms of Φ-variation 263–281

Седлецкий, А. М., Асимптотические формулы для нулей функции типа Миттаг–Леффлера 117–132

Shadrin, A. Yu., Interpolation by Lagrange polynomials, B-splines and bounds of errors 213–224

Singh, R. K. and Manhas, J. S., Invertible weighted composition operators on weighted function spaces 283–294

Скляров, В. П., О сходимости интерполяционного процесса Лагранжа–Эрмита для неограниченных функций 295–308

Tateoka, J., On Hardy–Bessel potential spaces over the ring of integers in a local field 133–145

Tkebuchava, G. E., On the divergence of spherical sums of double Fourier–Haar series 147–153

Volchkov, V. V., Morera type theorems on the unit disc 49–63

Weisz F., Atomic Hardy spaces 65–80

————, Hardy spaces of predictable martingales 225–233

Yin, X. R., On Szalay's theorem of double series 235–239

Zhou, S. P., A note on rational approximation rate for Müntz system $\{x^{\lambda_n}\}$ with $\lambda_n \searrow 0$ 155–159
